

Analyze CS Enterprise

Build knowledge and share intelligence

Griffeye's Analyze Collaboration Server Enterprise provides a central database and comprehensive toolkit for effectively processing and analyzing massive volumes of data. This highly structured, quality-controlled repository enables files to be easily accessed across an organization and extracted with ease in new investigations.

With the number of image and video files at an all-time high, CS Enterprise helps investigative teams convert this information into a valuable, actionable intelligence.

GET THE MOST OUT OF YOUR TEAM AND CRACK THE CASE

A streamlined interface assists in the visualization and review of digital material, while advanced algorithms take care of the tasks that used to be dealt with manually.

- Pre-categorize and prioritize information
- Stack duplicates and filter out non-relevant material
- Detect and highlight critical clues
- Identify relationships

DRIVE LONG-TERM INVESTIGATIONS AND COLLABORATIVE WORK

- Multiple users gain access to a unified database, where they can build on each other's intelligence work
- Data from past investigations is stored and easily retrieved for use in current investigations
- Information from other systems is easily migrated over, as well as exported for easy sharing
- User access control and extensive audit logs create a secure environment for collaboration

ACCUMULATE KNOWLEDGE OVER TIME

Stored knowledge becomes an asset for the future and can be used by new people on their first day. It also means that knowledge remains in an organization when individuals leave.

MANAGE AND ORGANIZE WITH EASE

The dashboard view provides an easy overview of the information and collaborative efforts.

SEE QUICKER PROGRESS

Automation gives your team the leg up on massive volumes of digital media. Investigations that used to take months, even years, can now be wrapped up in hours or days.

ORGANIZATION

Multiple cases. Multiple users.

CS Enterprise is ideal for large agencies and organizations that collaborate across borders. A powerful media management server provides ongoing access to all relevant media collected.

MYGRIFFEYE USER PORTAL

MyGriffeye User Portal is the gateway to a large and active community of users, developers and other stakeholders. You can exchange advice with your fellow Griffeye users, provide feedback on the platform and take advantage of a vast number of community-generated plug-ins.

ANALYZE FORENSIC MARKETPLACE

An extensive digital marketplace gives you access to valuable apps developed by Griffeye and by third-party developers – allowing you to add new functionality as your needs change.

ENTITY MANAGEMENT

Available as a module within Analyze CS Enterprise, Entity Management is a tool for detecting and tracing entities (such as persons, vehicles, organizations, objects) across your file database. Entities can be linked automatically or manually, which helps map relationships and highlight critical clues.
