

Analyze CS Operations

Share intelligence and crack cases

Whether you're working in a local, regional or special office, Analyze Collaboration Server Operations makes it possible to seamlessly share intelligence and tackle cases. Skip the grunt work and focus everyone's efforts on what's important thanks to a sophisticated toolkit for processing, sorting and analyzing huge volumes of image and video files.

TEAM

One case. Multiple users.

Designed for group efforts on individual cases, CS Operations gives you and your colleagues a digital base of operations for reviewing and analyzing materials.

FOCUS ON WHAT'S MOST IMPORTANT

A streamlined interface assists in the visualization and review of digital material, while advanced algorithms take care of the tasks that used to be dealt with manually.

- Pre-categorize and prioritize information
- Stack duplicates and filter out non-relevant material
- Detect and highlight critical clues
- Identify relationships

UNLOCK EFFICIENT COLLABORATION ON DIGITAL MEDIA INVESTIGATIONS

- A powerful server connects multiple users, enabling teams to gather knowledge in a centralized place and work together
- Automated processes help identify and tag material, significantly speeding up the time it takes to process and analyze each case
- Information from other systems is easily migrated over, as well as exported for easy sharing
- User access control and extensive audit logs create a secure environment for collaboration

GET STARTED WITH EASE

Intuitive and easy-to-use from the start, the user interface enables teams to quickly and easily categorize, prioritize and review complex information.

MANAGE AND ORGANIZE EFFECTIVELY
