

Analyze CS Operations license

For a team of investigators/forensic examiners working collaboratively with processing and reviewing huge volumes of media files as the major part of their daily work.

CASE EXAMPLE:

A team of 10 investigators/forensic examiners who work with processing and analyzing images and videos as the major part of their daily work. In addition to seamlessly share intelligence within the team and other teams, they also require a solution that allows them to handle even larger cases more effectively, and the possibility to share caseload and work together on cases simultaneously.

 Analyze DI Core	 Analyze DI Pro	 Analyze DI Pro Floating	 Analyze CS Operations
