

# Analyze DI Pro license

For investigators/forensic examiners working with processing and analyzing media files as the major part of their daily work.

## CASE EXAMPLE:

A team of 10 investigators/forensic examiners who work with processing and analyzing images and videos as the major part of their daily work. In addition to advanced analytical features and capabilities for review and analysis, their work requires the flexibility to process different cases across several machines, and the capacity to seamlessly share intelligence within the team and other teams. The team also benefits from the open platform that allows integration with other tools, third-party modules and plugins through an API.

If you need the installation to be accessible to more than one user simultaneously, you should instead purchase an Analyze DI Pro Floating license.

Analyze DI Core	Analyze DI Pro	Analyze DI Pro Floating	Analyze CS Operations
Personal licenses (non-shareable)	Personal licenses (non-shareable)	Non-personal (several concurrent users per license)	Server license (connect multiple users)
One machine installation per license	Four machine installations per license	Licensed to X concurrent users	For Analyze DI Pro users*
For individual work	Seamless collaboration	Seamless collaboration	Server collaboration
