

GET THE RIGHT TOOLS FOR YOUR WORK

The Griffeye Analyze platform is all about helping you get results. From working closely with customers and speaking with users, we've realized that this isn't always about giving you all the most powerful tools and deep functionality the platform can offer. Instead, it's making sure you have exactly the right tools and system to fit your needs, match how you and your organization work, and scaled to the data you ingest.

Modular, extendable and open, Griffeye Analyze is designed to match your personal, team and/or organizational workflows to give you the best user experience and the most efficient and effective results.

We call it versatile and interoperable, you can call it "Just what I needed."
